Join us in welcoming our new Chairman of the Board, Steve Giusto!

“As a parent of a cancer survivor, I know first hand that a cancer diagnosis for a child turns your world upside down. I also am a lucky and thankful example of a father who understands the miracles that research can have for kids and the families that care for them. Our daughter, diagnosed with stage IV neuroblastoma at five, is now a sophomore in high school and considering where to go to college.

At PCRF, we believe that great cancer research has the potential to change the trajectory of cancer care. But even more important, we believe in the potential of every child plagued with a cancer diagnosis. Whenever a child is born, every parent hopes that they will give their child the best opportunity to reach their greatest heights. A cancer diagnosis catastrophically interrupts that journey and rocks the very foundations of a family. Successful cancer treatments developed through the research we support replace despair with hope and re-establish the potential for children who survive and thrive.

When you make a gift to PCRF, you are investing in that potential. It is our job to make certain your dollars go towards the most promising research, and in our almost forty year history, we have built a legacy of finding and funding cutting edge research. During that time, the prognosis for children diagnosed with cancer has dramatically improved, and more and more children are surviving. But there is so much more to do and so
many more children to save. Even though pediatric cancer survival rates have improved from 20% to over 80%, cancer is still the second highest cause of death in children.

As we move into our fifth decade, please join PCRF in the quest for potential and for the creation of hope. As both PCRF Chairman and a relieved parent, thank you for your support.

Steve Giusto, Chairman of the Board
Pediatric Cancer Research Foundation

PCRF IN THE NEWS

Consider how you or your business can partner with PCRF to make a difference in the lives of children battling cancer this year. Your support powers hope and helps fund leading edge research that promises the best hope for a cure!

*Announcing our 2020 Grant Recipients!*  
The Pediatric Cancer Research Foundation (PCRF) is proud to award 6 new grants with a total of 18 grants in 2020. These new grants are comprised of three Basic Science, one Translational and three Emerging Research grants totaling $675,000. With these new additions, PCRF will fund over $2.2 million in 2020.
